

FTC Series

Caps for Flareless Tube and Nut Assemblies

Featuring a “cap within a cap” design, Series FTC closures can be easily applied to flareless hydraulic tube and nut assemblies. As the FTC Cap is pushed on the nut, the “outer cap” conforms to the hex shape of the nut, while the “inner cap” covers the tube and sleeve inside the nut to hold the assembly firmly in place. This series was formerly known as the FC Series.

Material: Low-Density Polyethylene **Color*:** Red

Caplug No.	Dimensions								Packaging
